Applicant

**ACTION INFORMATION TECHNOLOGIES LIMITED**

**1. This International Searching Authority**

- (i) considers that there are 2 (number of) inventions claimed in the international application covered by the claims indicated ~~below~~ on the extra sheet:

and it considers that the international application does not comply with the requirements of unity of invention (Rules 13.1, 13.2 and 13.3) for the reasons indicated ~~below~~ on the extra sheet:

- (ii) ☒ has carried out a partial international search (see Annex) ☐ will establish the international search report on those parts of the international application which relate to the invention first mentioned in claims Nos.:

see annex

- (iii) will establish the international search report on the other parts of the international application only if, and to the extent to which, additional fees are paid

**2. The applicant is hereby invited, within the time limit indicated above, to pay the amount indicated below:**

EUR 1.550,00 x 1 = EUR 1.550  
 Fee per additional invention      number of additional inventions      total amount of additional fees

Or, \_\_\_\_\_ x \_\_\_\_\_ = \_\_\_\_\_

The applicant is informed that, according to Rule 40.2(c), the payment of any additional fee may be made under protest, i.e., a reasoned statement to the effect that the international application complies with the requirement of unity of invention or that the amount of the required additional fee is excessive.

3. ☐ Claim(s) Nos. \_\_\_\_\_ have been found to be unsearchable under Article 17(2)(b) because of defects under Article 17(2)(a) and therefore have not been included with any invention.

Authorized officer

**Katrin Sommermeyer**

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-11,13-21

directed towards a data input apparatus that comprises  
(i) option selection means and direction selection means,  
which when used in combination determine a letter of the  
alphabet that is to be input into the attached device  
(ii) various specific embodiments of the option and  
direction selection means, such as manually operable  
elements, touch sensitive surfaces, and further keys placed  
inbetween a matrix of numeric keys.

---

2. claim: 12

directed towards a data input apparatus that comprises  
(i) option selection means and direction selection means,  
which when used in combination determine a letter of the  
alphabet that is to be input into the attached device  
(iii) a specific layout of the vowels of the alphabet

---

The so called 'inventions' 1 and 2 have in common the technical feature (i). However, this feature is already known from, or rendered obvious by document D1, which discloses a system that allows selection of an option by choice of a suitable key, and subsequent selection of a direction by tilting that key, thereby unambiguously determining a character to be input into the attached device (D1, column 32, line 47-column 33, line 17). The additional features (ii) and (iii) contained in inventions 1 and 2, respectively, are special technical features representing the contribution over the prior art of D1.

No technical relationship in the sense of Rule 13.2 PCT can be found between these additional technical features contained in each of said inventions. Moreover, the features (ii) and (iii) are directed toward solving different problems, namely: how to provide option and direction selection means; how to ease memorisation of the character layout. Therefore, there is no single unifying inventive concept underlying the entire group of claims of the present application as required by rule 13.1 PCT. Search is carried out for the invention first mentioned in the claims (invention 1).

**Annex to Form PCT/ISA/206  
COMMUNICATION RELATING TO THE RESULTS  
OF THE PARTIAL INTERNATIONAL SEARCH**

International Application No  
**PCT/GB2004/000115**

1. The present communication is an Annex to the invitation to pay additional fees (Form PCT/ISA/206). It shows the results of the international search established on the parts of the international application which relate to the invention first mentioned in claims Nos.:
- see 'Invitation to pay additional fees'**
2. This communication is not the international search report which will be established according to Article 18 and Rule 43.
3. If the applicant does not pay any additional search fees, the information appearing in this communication will be considered as the result of the international search and will be included as such in the international search report.
4. If the applicant pays additional fees, the international search report will contain both the information appearing in this communication and the results of the international search on other parts of the international application for which such fees will have been paid.

☒ Patent family members are listed in annex.

\* Special categories of cited documents :

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- \*G\* document member of the same patent family
